PERSONAL STATEMENT

I'm a Junior Full Stack Developer with experience building production web applications using JavaScript, React, Node.js, Python, PostgreSQL, and REST APIs. Currently working in a startup environment contributing to frontend interfaces, backend APIs, debugging, and internal tooling in a remote distributed team. I enjoy building products that solve real problems and improve user experience through simple, reliable engineering. Alongside my professional work, I've independently developed multiple full-stack projects, including AI-powered healthcare applications focused on usability, structured data, and workflow efficiency. I learn quickly, enjoy ownership, and like working closely with both technical and non-technical teams to ship meaningful features.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript (basic), Python
- **Frontend:** React, Next.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, FastAPI, REST API development
- **Databases:** PostgreSQL, relational databases
- **Cloud & DevOps Exposure:** Docker basics, Linux exposure, deployment workflows, Vercel, Render
- **Tools & Workflow:** Git, GitHub, Postman, Agile workflows, debugging tools
- **Strengths:** Problem-solving, ownership mindset, communication, rapid learning, collaboration

PROJECTS

- **AI-Powered Nursing Handover Tool**
Node.js, Express.js, PostgreSQL, OpenRouter, REST APIs, React (Next.js), Vercel
 - Built a full-stack healthcare application to improve clinical handovers and workflow efficiency.
 - Developed responsive frontend interfaces with React and Next.js focused on usability and structured data presentation.
 - Built REST APIs using Node.js and Express.js and integrated PostgreSQL databases.
 - Implemented authentication, protected routes, and real-time AI-generated summaries.
 - Improved reliability and user experience through debugging and iterative refinement.[Live](#) | [GitHub](#)
- **Exhibition Curator Platform – Frontend-Focused Web Application**
React (Next.js), JavaScript, Tailwind CSS, REST APIs, Vercel
 - Built a responsive web application integrating third-party APIs and structured datasets.
 - Developed reusable frontend components and filtering functionality for large data flows.
 - Focused on clean UI implementation, responsiveness, and maintainable frontend architecture.[Live](#) | [GitHub](#)
- **AI Etymology App – AI-Driven Web Application**
React (Next.js), JavaScript, DeepSeek API integration, Vercel, Copilot
 - Built a clean, intuitive interface focused on clarity and user engagement.
 - Integrated APIs to display structured content in a user-friendly, accessible format.
 - Focused on performance optimisation and responsive behaviour across devices.[Live](#) | [GitHub](#)
- **React News App – Frontend Web Application**
React.js, HTML, CSS
 - Built a responsive frontend application integrating third-party APIs for live data.
 - Focused on component reusability and scalable architecture.[Live](#) | [GitHub](#)
- **Backend REST API Project**
Node.js, Express.js, PostgreSQL, Jest, Supertest
 - Built a robust REST API using MVC architecture, including validation and error handling.
 - Achieved >95% test coverage, ensuring high reliability and maintainability.
 - Designed endpoints to handle complex queries and relational data structures.[Live](#) | [GitHub](#)

EXPERIENCE

- **Junior Full stack Developer | SOHMA AI | November 2025—Present**
 - Build and maintain production web applications using React, JavaScript, Node.js, and Python (FastAPI).
 - Develop frontend interfaces and backend APIs supporting structured data workflows.
 - Designed and developed APIs using FastAPI to support internal tooling and testing workflows.
 - Debug production issues across frontend and backend systems to improve reliability and usability.
 - Built internal testing tool using HTML, CSS and JavaScript that reduced testing time by 20%.
 - Collaborate in Agile environment with engineers, product, and non-technical stakeholders.
- **Junior Full Stack Developer (Freelance) | Northcoders Projects | July 2025—October 2025**
 - Built full-stack applications using React, Node.js, and PostgreSQL, focusing on scalable architecture.
 - Developed reusable components and implemented API integrations to support efficient data flow.
 - Applied test-driven development (TDD) to ensure code quality and reliability.
 - Collaborated in Agile teams using pair programming and code reviews.
 - Implemented data-driven features and API integrations across projects.
- **Self-Development | October 2024—April 2025**
 - Built multiple portfolio projects, applying best practices in responsive design, accessibility, and performance optimization.
 - Strengthened debugging, problem-solving, and pragmatic engineering practices through real-world coding challenges.
- **Disability Analyst | Maximus UK | August 2018—October 2024**
 - Produced 100+ structured reports monthly, demonstrating attention to detail and analytical problem-solving.
 - Gathered and analyzed client requirements, developing transferable problem-solving and communication skills.
 - Mentored new team members, enhancing team collaboration and knowledge transfer.
- **Registered Nurse | The Whittington Hospital | January 2017—August 2018**
 - Worked in high-pressure environments, adhering to strict compliance and process standards.
 - Mentored junior staff and collaborated in multidisciplinary teams, strengthening teamwork and adaptability.

EDUCATION

- **Northcoders Coding Bootcamp | Software Development | April 2025—July 2025**
 - Completed an intensive, project-based programme in full-stack web development.
 - Strengthened problem-solving skills and computer science fundamentals through hands-on coding challenges.
 - Gained practical knowledge of JavaScript, React, Node.js, PostgreSQL, and REST API design.
 - Learned Agile methodologies, pair programming, and test-driven development (TDD) as part of collaborative projects.
- **Additional Training & Certifications**
 - JavaScript Algorithms and Data Structures | freeCodeCamp | November 2024—February 2025
 - Responsive Web Design Certification | freeCodeCamp | February 2025
 - Cybersecurity (Google & IBM) | Coursera | October 2024—November 2024
- **University of Turin, Italy | Bachelor's Degree in Nursing (STEM) | September 2009—March 2012**
- **Giordano Bruno High School, Turin, Italy | Scientific High School Diploma
Equivalent to UK A-Levels with a focus on science subjects | September 2003—July 2008**

HOBBIES AND INTERESTS

- **Composing music** – I love exploring synths, drum machines, and Digital Audio Workstations to build atmospheric and rhythmic electronic tracks. It's my creative outlet and I could spend hours creating just one sound.
- **Psychology** – I'm fascinated by how people think and behave, especially around cognition and emotional intelligence. I developed this passion while working in the healthcare sector and enjoy reading articles and books about it.
- **Coding** – Building things from scratch and solving problems through code keeps me constantly learning. It's both a creative and logical challenge. Strong interest in consumer products, social platforms, and AI-powered applications.
